Subject: Urgent - PSPS & County MOUs

Hello,

There seems to be ongoing confusion regarding sharing medical baseline customer information with counties during a PSPS event. This issue has been discussed many times over the last several months and the CPUC staff understanding is as follows:

- ~~EEEEEE~~ Once a utility has initiated PSPS protocol, it will share medical baseline customer information with impacted County's Emergency Response team *even if there is no NDA in place*
- ~~EEEEEE~~ Outside of an event, if a county requests medical baseline customer information, a utility will require signing of an NDA prior to sharing the data

Again, my understanding from multiple conversation on this over the last few months that utilities ***will not*** require counties to sign an NDA in order to receive medical baseline information during a PSPS event.

This has once again become an issue with PG&E. Can SCE and SDG&E please confirm their current practice and what you are messaging to your counties regarding this issue?

Thanks,

Elizaveta Malashenko
